

## Stevens County

### Estimated Economic Impact of Agriculture, Food, and Food Processing Sectors

10/13/14

10 agriculture, food, and food processing sectors were analyzed to determine their overall contribution to the Stevens County economy.<sup>1</sup>

These 10 sectors have a total direct output of approximately \$223 million and support 979.2 jobs in Stevens County. Running the model for all 10 sectors simultaneously produces the following results:

Agriculture Contribution in Stevens Co						
Impact Type <sup>2</sup>	Employment	% Employment	Total Value Added <sup>3</sup>	% of Gross Regional Product <sup>4</sup>	Output <sup>5</sup>	% of Gross Regional Product
Direct Effect	979.2	28%	42,335,641.5	21%	222,606,640.4	108%
Indirect Effect	171.8	5%	18,748,889.8	9%	30,438,122.3	15%
Induced Effect	181.3	5%	13,521,279.9	7%	21,316,060.5	10%
Total Effect	1,332.2	38%	74,605,811.2	36%	274,360,823.3	133%

As shown in the above table, agriculture, food, and food processing supports 1,332.2 jobs, or 38% of the entire workforce in the county. These industries provide a total economic contribution of approximately \$274 million, roughly 133% of Gross Region Product (GRP). As noted below in the calculation of Gross Regional Product, imports and institutional sales are subtracted. Therefore, counties that import a relatively large amount of goods and services will have a reduced GRP which may lead to agricultural output being greater than GRP.

Another metric used to calculate the importance of sectors in an economy is their value added as a percentage of GRP. Total value added by the 10 agriculture, food, and food processing sectors is approximately \$75 million, or 36% of the GRP. This indicates that personal income, business income, and taxes generated by these sectors account for 36% of the total economy.

<sup>1</sup> Article on building a contribution analysis in IMPLAN that avoids double counting:

[http://www.implan.com/index.php?option=com\\_content&view=article&id=660%3A660&catid=253%3AKB33&Itemid=70](http://www.implan.com/index.php?option=com_content&view=article&id=660%3A660&catid=253%3AKB33&Itemid=70)

<sup>2</sup> Direct, indirect, and induced effects sum together to estimate the total economic contribution in the state. **Direct effects** capture the contribution from agricultural and food products. **Indirect effects** capture the economic benefit from farms and agricultural businesses purchasing inputs from supporting industries within the state. **Induced effects** capture the benefits created when employees of farms, agricultural businesses, and the supporting industries spend their wages on goods and services within the state.

<sup>3</sup> Value added = labor income + indirect business taxes + other property type income.

<sup>4</sup> GRP = final demand of households + governments expenditures + capital + exports - imports - institutional sales.

<sup>5</sup> Output = intermediate inputs + value added.

The following tables document the overall summary numbers of the model, top industries affected by employment and output, and a listing of all industries that were analyzed.

In the top ten by employment, Grain farming is the top employer in the agriculture industry with 588.5 employees. This table also shows the amount of jobs that are created by the agriculture industry in Stevens County.

Description	Total Employment	Total Output
Grain farming	588.5	152,296,748.5
Support activities for agriculture and forestry	296.1	1,818,554.0
Cattle ranching and farming	76.8	53,572,331.1
Real estate establishments	51.0	6,593,559.8
Food services and drinking places	39.3	2,011,849.1
Monetary authorities and depository credit intermediation activities	30.7	10,303,183.8
Wholesale trade businesses	30.5	5,930,725.9
Other state and local government enterprises	14.4	2,498,290.9
Securities, commodity contracts, investments, and related activities	13.4	1,679,161.3
Transport by truck	13.3	2,088,742.0

The Grain farming industry directly contributes approximately \$152 million to Stevens County's economy. This table also shows how much revenue is generated in other industries by having a strong agriculture industry.

Description	Total Employment	Total Output
Grain farming	588.5	152,296,748.5
Cattle ranching and farming	76.8	53,572,331.1
Monetary authorities and depository credit intermediation activities	30.7	10,303,183.8
Real estate establishments	51.0	6,593,559.8
Imputed rental activity for owner-occupied dwellings	0.0	6,268,157.4
Wholesale trade businesses	30.5	5,930,725.9
Oilseed farming	8.0	5,724,548.0
Cotton farming	2.4	3,753,804.2
All other crop farming	2.0	3,204,532.8
Other state and local government enterprises	14.4	2,498,290.9

Below is a summary of all agriculture data with employment levels and output level. These values can tell how many jobs are represented by each agriculture sector and the output they contributed to Stevens County's economy.

[illegible]

All 105 counties in Kansas have Implan models and agriculture contribution summary. These values do not factor in the retail environment of food sales. Food retail is important, but in order to provide the most accurate picture of what production agricultural and processing contributes to Kansas, the retail sector was omitted.
